

The EXP 65+ heavy duty thermal laminator provides wide format finishing solutions with a small footprint. Whether you are looking to laminate, mount, or encapsulate media, the EXP 65 provides the functionality of all three. The EXP 65+ is ideal for roll-to-roll lamination and offers single sided lamination, simultaneous adhesive mounting and laminating, rigid panel mounting, and encapsulation with thermal or cold films.

Key Features:

- ❑ Digital control panel with programmable memory settings
- ❑ Foot pedal for hands-free lamination
- ❑ Optical eye safety mechanism
- ❑ High-Quality silicone rollers and easy clean-up features make for low maintenance
- ❑ Integrated takeup shaft for roll-to-roll lamination
- ❑ Mounts onto rigid panels up to 2" (5cm) thick
- ❑ Swinging feed table for easy supply access
- ❑ Self-leveling rollers
- ❑ Quartz heating lamps for even and consistent roller temperatures
- ❑ Optional LED light bar for better visibility during lamination

Film Roll Storage

Technical Specifications

Part Number	EXP 65T
Working Width:	65"
Laminator Width:	81"
Height:	60"
Depth:	33"
Net Weight:	720 lbs.
Shipping Weight:	738 lbs.
Maximum Speed:	21 fpm
Maximum Temperature:	280° F (top and bottom rollers)
Maximum Aperture:	2"
Maximum Film Diameter:	9"
Maximum Film Weight:	100 lbs.
Air Requirements:	N/A
Electrical Requirements:	230 - 240V 15A
